I am pleased to highly recommend Xiaofan Guo, who is currently undertaking a research internship at Orange, focused on energy efficiency in 5G networks. As Xiaofan's former professor at ISEP, I have had the opportunity to observe her exceptional skills in development and research.

Xiaofan has demonstrated a deep understanding of 5G networks as well as the ability to apply theoretical concepts to practical projects. During the first months of her internship, she quickly adapted to a dynamic work environment by deploying a virtualized 5G environment and analyzing and comparing the energy consumption of various 5G cores. She has also worked extensively on improving her communication during the project and team meetings.

Her passion for innovation and her commitment to excellence make her an ideal candidate for a thesis. I am confident that she will continue to excel in her projects and bring significant value to any organization. Please feel free to contact me if you require further information.
